

**SOUNDCAST™**  
UNLEASH YOUR AUDIO

## SubCast

### Make your powered subwoofer or any self-amplified speaker wireless in minutes!

This product is to make any self amplified speakers wireless. This will enable the dealer/customer to place powered speakers anywhere they desire. So, this device solves bass dropouts and makes the hometheater experience possible no matter what the room configuration. The SubCast contains one transmitter and one receiver. This SubCast is mostly used to make a subwoofer wireless however you cant use the system to make any powered speaker work in your stereo or surround environment.

#### How to make this device work

- Connect the transmitter to the desired Pre-out on the receiver.
- Connect the receiver to the input on the chosen speaker.
- Wires are provided!

#### Tech Notes

- Make sure to have the Channel of the Transmitter and the Receiver set to the same i.e. Channel 1.
- Be sure to connect the wires properly using the wires provided.
- You can have up to 4 subs running on a properly configured system!!! See manual for details
